

INSENSIV
BETTER_TO_KNOW

Quality assurance units

In the context of continually increasing quality demands placed on products, quality assurance units are used to validate processes (value printwork). insensiv quality assurance units have been established nationwide on the German market, especially in regards to the subject of the one-way deposit of the DPG Deutsche Pfandsystem GmbH.

insensiv offers quality assurance units for different institutions:

- Quality assurance units for printing plants and filling plants (Equipment group CV)
- Incoming goods inspection devices as handheld units for the retail sector (Equipment group WE)
- Read-out units for reverse vending machines and high-speed industrial counting systems / centres (Equipment group SR/SRB)

Custom-made technical solutions are complemented by individual service concepts. insensiv's solutions meet your requirements and ensure a consistently high level of quality. Based on the comprehensive product portfolio you will find a competent partner for the qualitative assessment of, for example, DPG-markings and barcodes. A competent, high-performance (highly performant) service guarantees a high level of economic efficiency and functional reliability for all products.
