Can_Separator

The **Can_Separator** will increase the quality of the can separation on your production line to be able to inspect the full 360° range with your label inspection system. This system will reduce fake spoilage caused thru visible neighbor cans and reflections of neighbor cans where so far a reduction of the field of view was required. The Can Separator works contact free on a pneumatic basis.

Your benefits

- **Increases the quality of the can separation**
- **Contact free pneumatic based system**
- **Higher efficiency than a speed conveyor**
- **Flexible and easy installation**
